Energy Consulting Network***

SUSTAINABLE ENERGY
SET at Work
TECHNOLOGY AT WORK

**Econcern COP14
Poznan, 8th December 2008**

www.setatwork.eu

1

SETatWork: About The Project

Scope of Work

- **Thematic Promotion of Sustainable Energy Efficiency Technologies at Carbon Markets: EU ETS and CDM**

Technology focus

- **Energy Efficiency and Saving**
- **High-efficient polygeneration**

Funding

- **EU's 7th Framework Programme**

Project Period

- **1 Sept 2008 – 1 Sept 2010**

Objectives

Technological overall objective:

- To promote the use of **sustainable energy technology** at the world's carbon markets in order to meet local sustainable energy goals and develop EU interests within the market

Scientific overall objective:

- To spread knowledge among market actors and regulators on adequate approaches and solutions, as well as to position EU researchers and industries on the carbon markets

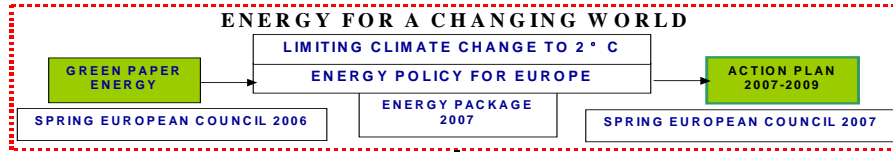

SETatWork Partners

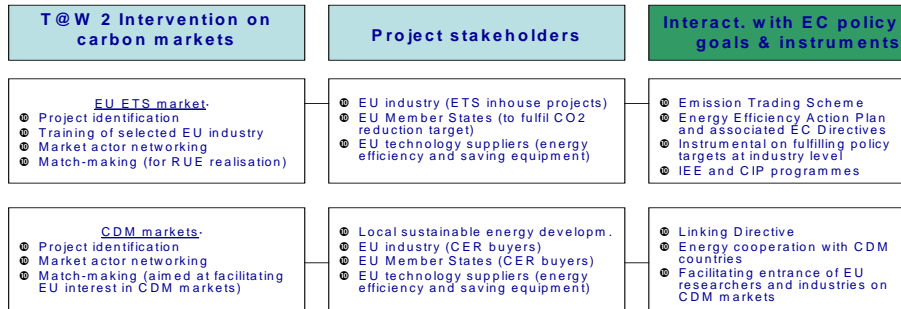

- **EU Energy Industry**
 - Danish Confederation of Industry (will facilitate contacts to other EU industry organisations)
- **Facilitators on the Targeted ETS Markets**
 - European partners: IST/IDMEC-Portugal, ETA-Italy, ZREU KEWOG-Germany, SEC – Bulgaria, ECB – Slovakia, ECOFYS PI.-Poland, ECNet – Denmark, KanEnergi – Sweden and CPL- UK
- **Facilitators on the Targeted CDM Markets**
 - China: GIEC and ZERI
 - South East Asia: CEERD (based in Thailand)
 - India: TERI
 - Chile: APLE

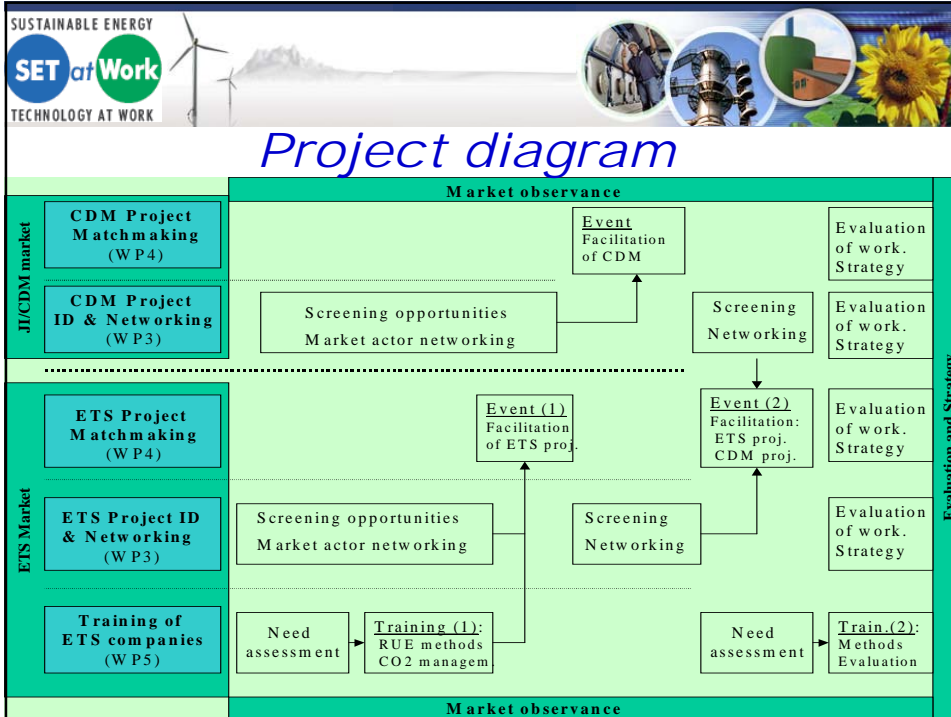

Context

Scope of 'SET at Work' Action

SETatWork – Highlights

Training of selected European ETS industry sectors

- **The training is to help the industries on handling the complex of energy and CO2 management with focus on Portugal, Italy, Bulgaria, Slovak-Czech R, Poland, Germany, Denmark and Sweden**
- **The training will be based on assessment of the industry needs via survey and company questionnaires**
- **Will culminate with two times 7 training workshops in the targeted countries**

SETatWork – Highlights (cont'd)

Sustainable Energy Technology Project Identification

- **ETS market: Identifying opportunities for specific action at the industries for CO2 reduction measures in Portugal, Italy, Bulgaria, Slovak-Czech R, Poland, Germany, Denmark and Sweden (managed by the local partners in coordination with industry organisations)**
- **CDM market: Identifying specific project opportunities in industry sectors in China, India, South East Asia, Chile and Brazil (managed by the local partners in cooperation with EU partners and industry organisations)**

SETatWork – Highlights (cont'd)

Match-making and Events

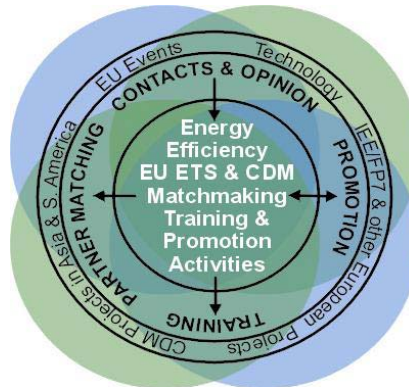

- **16 match-making events will be arranged in Europe and 9 in Asia/South America. These will try to establish contacts between project owners and technology/service providers**

- **COP14 and 15: side-events to these meetings will be arranged to highlight the possibilities of energy efficiency in industry, and to highlight the project and its partners.**

Not least

SETatWork is about facilitation of market activities

Use our services

Find Partners for your Projects
with the T@W Partner Matching Service >>>

The T@W Partner Matching Service will

enable EU ETS companies interested in participating in projects to register with T@W and receive contact details for suitable technology and service providers

connect those interested in participating in EU ETS and CDM projects to relevant technology providers and interested partners in Europe and Asia.

provide an online database of Technology and Service Providers

Find further information and project partners at www.setatwork.eu/pm.htm or contact info@setatwork.eu

Use our services (cont'd)

Information about the carbon markets - policy, activities, etc.
