

# Introduction to the T@W Project

- and its efforts on paving way to  
CDM markets in Asia

**Nils Daugaard,  
Energy Consulting Network**

## T@W: Starting Point

- EU's Emission Trading Scheme (ETS) Directive following EU's target on 8% CO<sub>2</sub> reductions  
⇒ Companies in EU operating under the ETS markets are encouraged to use of sustainable energy technologies
- EU Linking Directive in relation to the JI and CDM project mechanism  
⇒ Companies in EU are able to achieve CO<sub>2</sub> credits via JI and CDM projects in Asia and Russia, thereby boosting a market for sustainable energy technologies
- New EU policy entails strengthening of energy & climate efforts ⇒ A review of recent EU policy will be made in later presentation of José Fluxa Garcia/DG TREN

## T@W: Objectives

- The key objective is to assist companies in the EU to meet the challenge of climate change
- The action is to help promote specific project development in co-operation with industries and concepts for technology implementation, incl. using research results of EU's Framework Programme
- Part of the action action is to develop cooperation with Asia and initiate joint action on research & business, including climate projects (CDM)

# T@W : Project partners

- EU Sustainable Energy Industry

Branch organisation for co-generation, COGEN Europe

The European Biomass Industry Association, EUBIA

The European Association for Small Hydro Power, ESHA

- Facilitators on the Targeted Carbon Markets

European Partners: IST/IDMEC-Portugal

, EVE-Spain

ZREU-Germany **ZREU**, SEC – Bulgaria

, ECB – Slovakia

ECNet – Denmark

ENERGY CONSULTING NETWORK

, KanEnergi – Sweden

KanEnergi

CPL- UK **cplpress** and IEO-EC BREC-Poland

Asian Partners: China: GIEC

and ZERI

Thailand: CEERD **CEERD**

Malaysia: PTM **PTM**

India: TERI **teri**

## T@W Intervention: EU ETS Markets

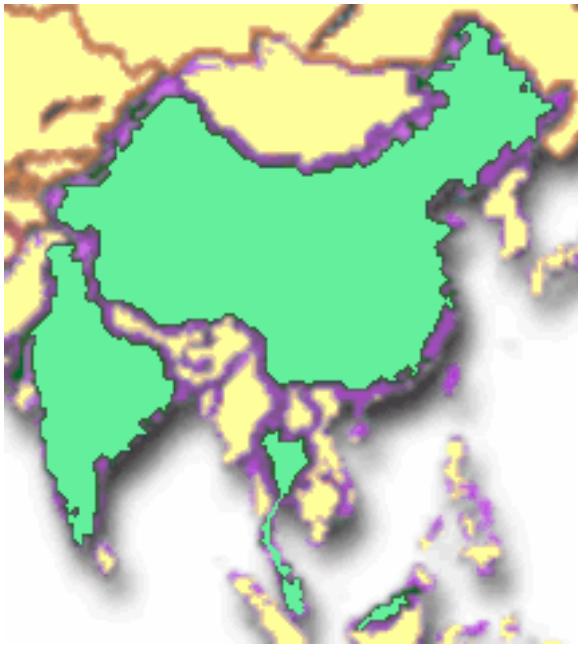

- Pilot projects at ETS company level
- Business investment concepts
- Exploring RTD needs

⇒ Publication on Key Findings By End Of Action

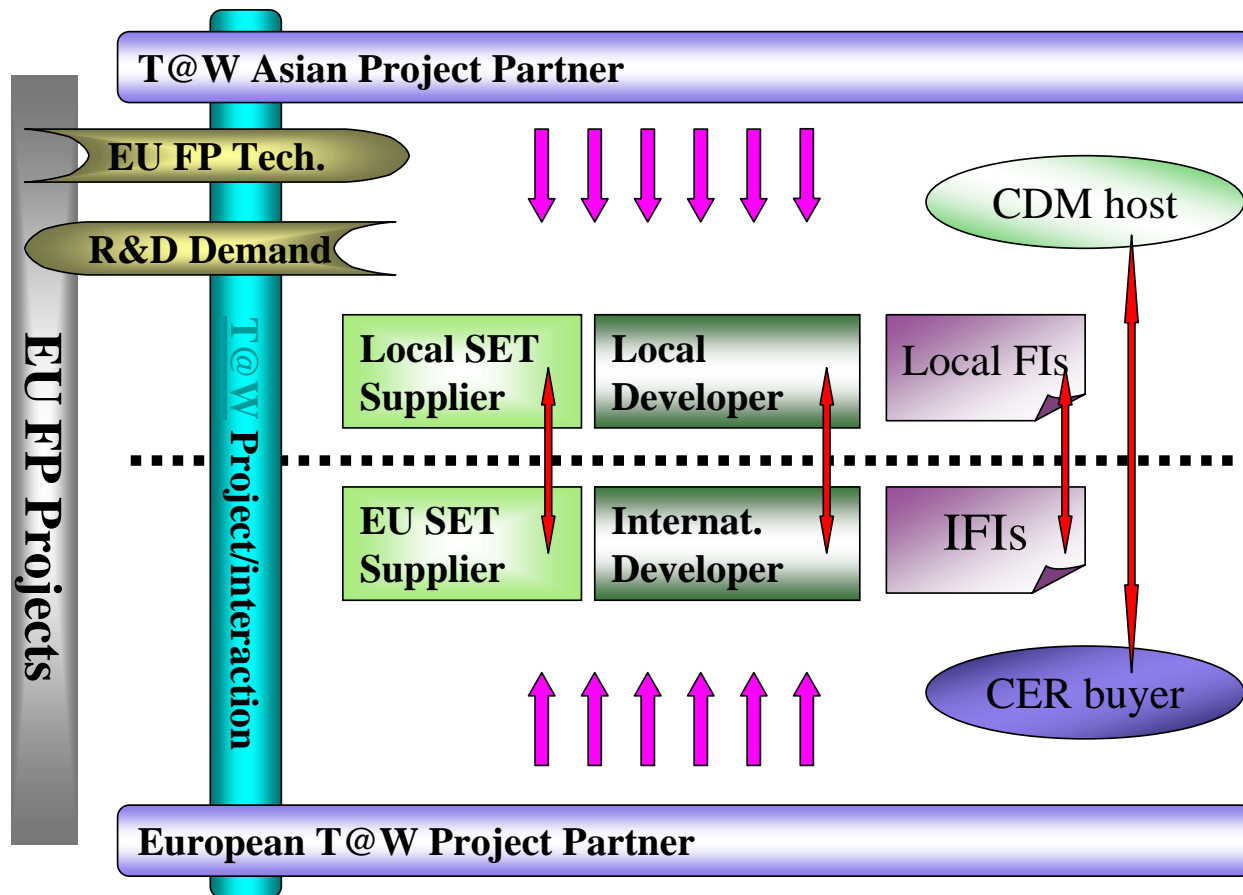

## T@W Intervention: CDM Markets in Asia

- Pilot CDM projects
- RTD & business cooperation between Asia and EU

⇒ Publication on Key Findings By End Of Action

# TatW Intervention at CDM Market

## State of activities in Asia

- T@W has made situation analysis, including research and business needs
- A number of CDM projects have been identified in China, Malaysia, Thailand and Asia
- January-February 2008, we undertook successful Facilitation workshops in Guangzhou-China, New Delhi-India, Bangkok-Thailand and Kuala Lumpur-Malaysia
- Asian partners will present details of the identified opportunities, and we invite EU stakeholders to take these opportunities

## Future activities – SETatWork

- The European Commission will support a new project period – under the heading Sustainable Energy Technology at Work/SETatWork
- The new project is expected to run from June/July 2008 and the coming two years
- SETatWork will put focus on energy efficiency, incl. promotion of concepts like Programmatic CDM
- SETatWork entails a number of follow-up initiatives for EU industry to exploit opportunities at the carbon markets in EU, Asia (China, India and South-East Asia) and Latin America (mainly Brazil and Chile)

# T@W: Use our services

Find Partners for your Projects

with the T@W Partner Matching Service >>

The T@W Partner Matching Service will

**enable** EU ETS companies interested in participating in projects to register with T@W and receive contact details for suitable technology and service providers

**connect** those interested in participating in EU ETS and CDM projects to relevant technology providers and interested partners in Europe and Asia.

**provide** an online database of Technology and Service Providers

Find further information and project partners at [www.setatwork.eu/pm.htm](http://www.setatwork.eu/pm.htm) or contact [info@setatwork.eu](mailto:info@setatwork.eu)
